Security

G-bags would like to make your shopping experience safe and enjoyable for our valued customers. We use Secure Sockets Layering (SSL) to encrypt your personal credit information, including your credit card number, before it travels over the Internet. SSL technology is the industry standard for secure online transactions. Because we use SSL, placing an order online is just as safe as giving your credit card number over the telephone.

The SSL protocol has become the universal standard on the Web for authenticating sites and for encrypting communications between users and Web servers. With SSL, all information is encrypted by the sending software and decrypted by the receiving software, protecting private information from interception over the Internet. In addition, all data sent over an encrypted SSL connection is protected with a mechanism for detecting tampering - that is, for automatically determining whether the data has been altered in transit. This means that customers can confidently send private data, such as personal information, to our Web site, trusting that SSL keeps it private and confidential.
